

# **ALCM-UT** Coriolis Mass Flowmeter Model ALCM Series

### **GENERAL**

SMARTMEASUREMENT's ALCM-UT uses two tubes formed into a U-shaped geometry in a parallel arrangement which are vibrated at their resonant frequency by coils. Any mass flow passing through the tubes will generate Coriolis forces, which appear whenever a mass moves radially in a rotating system. These forces have opposite effects on the inlet and outlet side, deforming each tube by a minor amount. The excursion of the pipes is detected by sensors located at the meter inlet and outlet and is measured as a time delay, or phase shift. The phase shift between the inlet and outlet of both tubes is directly proportional to the mass flow rate. The resonant frequency of the tubes changes in proportion to the density of the fluid media. This effect allows for the measurement of media density. Using only one sensor, both density and temperature measurements may be performed as the extent of deformation of the pipes is temperature- dependent. Therefore, the temperature is measured for compensation purposes. Using only one instrument, values including mass flow, density, and temperature may be measured. The ALCM's microprocessor-based circuitry also allows for calculated values such as volumetric flow, % concentration, and % water-cut to be determined.

#### **FEATURES**

- Suitable for aggressive and contaminated media
- Measurement of mass flow, density, temperature and volume flow
- Measurement & display of % water cut for oil/water mixtures
- High rotation frequency and well-balanced measuring tubes
- Excellent purging and sterilization qualities due to a construction free of dead spots
- Operation up to +300°C
- Individual 8-point-calibration including report
- EX protection (optional)
- PT100 temperature sensor Included

# No Flow

**SPECIFICATIONS** 

2,866~5.5 million Lb/hr Flow Range: (1,300~1.5 million kg/hr) \*\*

1½"~10" (40-250 mm)\*\* Line Sizes:

**Process Connections:** Flanged (ANSI, DIN, Tri-Clamp®)

Tube geometry:

Accuracy: ±0.5% of reading (std), 0.2% or 0.15% (opt)

±0.075% of reading Repeatability:

10-2000 Hz Frequency:

Display: Color Graphic OLED

Eng. Units (mass): kg, lb, ton °C, °F Eng. Units (Temp):

m³, Liter, US Gallon, Imperial Gallon, Mil-Eng. Units: (Vol.)

lion Gallon

Zero Stability: 0.1% full-scale

Zero Drift (%FS / °C): 0.005

-58~662°F (-50~350°C) **Process Temperature:** 

-5~312°F (-20~55°C) Ambient Temperature: Max Working Pressure: 360 psig (2.5MPa) std, 930 psig optional

Measuring Tube Mat'l: SS per DIN1.4571 (AISI 316Ti) standard

Housing Material: SS #304

Power Supply: 24 VDC, ± 20%; 86~260VAC, 50~60Hz

**Power Consumption:** Less than 6W

Outputs: 4-20 mA, 0-10 kHz pulse, RS485

Density Meas. Range: 0.2~2.0 g/cc **Density Accuracy:** ±0.001 g/cc Water Cut Meas.Range: 0-100%

Water Cut Accuracy: ±0.1% of range up to ±1°C **Temperature Accuracy:** 

UL/CUL/CSA, Class 1, Div I & II Approvals:

#### Accuracy:

This diagram shows typical values. Individual values may be taken from the calibration records supplied with each meter.

#### Repeatability:

| ACCURACY      | 0.10%  | 0.20% | 0.50%  |  |  |
|---------------|--------|-------|--------|--|--|
| REPEATABILITY | ±0.05% | ±0.1% | ±0.25% |  |  |

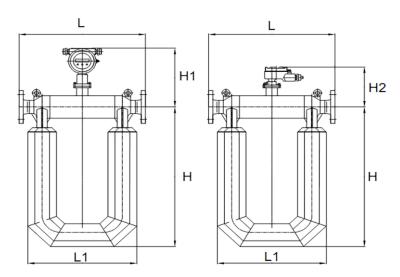

Accuracy is calculated based on the water measurement under the condition of  $+20^{\circ}$ C  $\sim~25^{\circ}$ C and 0.1MPa  $\sim~0.2$ MPa.

#### **Density Measuring:**

| DENSITY RANGE  | (0.2~2.0) g/cm <sup>3</sup> |  |  |  |  |  |
|--|-----------------------------|--|--|--|--|--|
| BASIC ERROR ±0.002g/cm³ (Affected by the transducer) |                             |  |  |  |  |  |
| REPEATABILITY  | 0.001g/cm³                  |  |  |  |  |  |

# ALCM-UT

# Coriolis Mass Flowmeter Model ALCM Series

TYPE OF FLUID

Please provide the name of your fluid, including operating density and viscosity  $% \left( 1\right) =\left( 1\right) \left( 1\right)$ 

FULL-SCALE FLOW RATE Please prov

Please provide the max and min flow rate, normal flow rate also

PROCESS PRESSURE & TEMPERATURE

Please provide the line size and connection type

PRESSURE DROP

We will calibrate your flow meter as close to your operating conditions as possible Please indicate the maximum allowable pressure drop

TYPE OF ELECTRONICS
POWER REQUIREMENTS

Please specify output and installation type (wall mount, panel mount, etc.)

Please specify AC or DC power supply
